PROJECT EXPERIENCE

Personal Project: Event Planning Platform - https://eb2.herokuapp.com/
- A website that allows users to search for opportunities to get together with their friends or nearby people. The purpose of the website is to allow users to create events and invite their friends to participate in it. Technologies used includes: jsx, css, bulma, javascript, reactjs, redux, mongodb, nodejs, and express.

Department Project: Instructor Training Database for Oregon State University (OSU) Ecampus
- Worked with a 2-person team to develop a Windows form application that can keep track of instructor training information for the Ecampus team at OSU. This c# Windows form application takes in training information such as: the training name, instructor, list of attendees, and more. Technologies used included: c#, sql, and Windows Forms Application.

Class Project: Corvallis Police Department (CPD) Inventory Tracking Project
- Worked on a 4-person team and developed a proposed website to improve a subset of the CPD's inventory tracking system. The functionality of the website included being able to input inventory data into a SQL database and displaying a report of current inventory on hand. Technologies used included: c#, asp.net, html, and sql.

WORK EXPERIENCE

Accountant I at Simple Finance - Present
- Assist in Simple's billing processes, employee reimbursements, and closing the books on a monthly basis. Currently have a Front-end mentor at Simple who I meet on a bi-weekly basis and has helped me grow in trending web development technologies.

EDUCATION

Oregon State University | Corvallis, OR | B.S. Degree in Management/Business Information Systems & Accounting
Overall Unweighted GPA: 3.37/4.0
